EXPERIENCE

Intel, Hillsboro OR — Data Scientist

APRIL 2015 - March 2023

As a strategic analytics leader in Corporate Quality Network, I drove data-driven decision-making and innovation through advanced quantitative and qualitative analysis. I also designed and implemented comprehensive analyses, using descriptive, inferential, and statistical methods to extract valuable insights that informed key business strategies. By developing forecasting models, scenario analyses, and Pareto analysis, I optimized resource allocation and facilitated operational improvements. Further working closely with cross-functional stakeholders and data engineers, I ensured the integrity, accuracy, and alignment of data with business goals, resulting in actionable recommendations that supported business success.

StatVisions, Folsom — Data Visualization Engineer

APRIL 2014 - APRIL 2015

Created custom d3.js interactive data visualizations for a search engine optimization software company so their customers could see delivered value across the United States. Delivered and implemented a data visualization course curriculum for UC Davis Extension.

Milliman, San Francisco — Actuarial Analyst

AUGUST 2000 - OCTOBER 2013

Developed and deployed advanced statistical, actuarial, and financial models to minimize risk exposure for pension and health plans, integrating demographic data while ensuring HIPAA compliance. Led projects to automate reporting solutions, perform actuarial present value calculations and actuarial cost. Collaborated with cross-functional teams to design and implement models, offering expertise in financial engineering and advanced analytics to enhance operational efficiency.

EDUCATION

University of California at Berkeley, Applied Mathematics

AUGUST 1996 - AUGUST 2000

Operations Research

SKILLS

Actuarial Mathematics

Power BI

Python

R Programming

SQL

Excel

AWS Redshift

D3 Custom Data Visualization

LANGUAGES

French, Spanish
